**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 04 October 2001.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Restriction/Election***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-27, drawn to a hybrid cytokine comprising a polypeptide with predetermined identities to two distinct cytokines (for example, IL-7, and beta chain of HGF) with an oligosaccharide linker, and a recombinant method of making the product, and using it for treatment of lymphocyte related disorders, classified in class 435, subclass 69.1.

Group II. Claims 28-31, drawn to an expression vector containing the cDNA sequence for the B-chain component of the hepatocyte growth factor, classified in class 435, subclass 320.1.

These inventions I-II are each independent and distinct for the following reasons.

Inventions I-II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

In the instant case, invention of Group I involving methods of making, and using hybrid cytokines comprising two different cytokines with defined degree of identities to the corresponding natural sequences of the said cytokines, is distinct from invention II comprising an expression vector containing only one of the two cytokines that form the hybrid cytokine and host cells carrying the expression vector. Furthermore, these are materially distinct processes for which HGF may be used that the hybrid may not be used and vice versa. Therefore, these two inventions are patently distinct.

---

Having shown that these inventions are distinct for the reasons given above, they have acquired a separate status in the art shown by their different classification, and recognized

divergent subject matter as defined by MPEP § 808.02, the Examiner has prima facie shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
